EDUCATION

Georgia Institute of Technology

Atlanta, GA

B.S. Computer Science, GPA: 3.9

May 2028

- Threads: System Architecture & Cyber Security; Member, GreyHat Cyber Security Club
- Courses: Human Dimension of Cybersecurity, Systems & Networks, Data Structures & Algorithms, Design & Analysis of Algorithms, Computer Organization & Programming, Objects & Design, Discrete Math

EXPERIENCE

GitHub

San Francisco, CA

Software Engineer Intern

Summer 2026

- Summer 2026

GT Financial Services Innovation Lab

Atlanta, GA

Undergraduate NLP Researcher

2025 – Present

- Built a LangGraph text-to-SQL pipeline with human-in-the-loop ambiguity detection, achieving 93.9% recall and 80.6% accuracy.
- Reduced unnecessary user interruptions by 3x by designing a multi-signal confidence scoring system that determines when the AI should answer vs. ask for clarification.
- Annotated 150+ credit card agreement questions using CoT and PoT reasoning for NLP model training.

The Home Depot

San Francisco, CA (Remote) / Atlanta, GA

Software Engineer Intern

Summer 2025

- Partnered with Product, Design, and Engineering teams to re-architect and enhance event software for 100+ annual events used by 5000+ associates.
- Developed web app with Slack integrations using Java Spring Boot and React, deployed on Google Cloud Kubernetes with automated GitHub CI/CD pipelines.

Computacenter

Remote

Software Engineer Intern

2022 – 2023

- Created a Slack app enabling admins to on/offboard 5K+ employees across systems like ServiceNow, Opsgenie, PRTG, and Slack using FastAPI.
- Developed hardware error monitoring tool interfacing with NocoDB, scaled to 50+ customers.

Neucargo

San Francisco, CA

Co-Founder

Summer 2022

- Developed Smartsheet integration to automate tracking of UPS, FedEx, and MACH1 shipment statuses.

PROJECTS

Matchy (JPMorganChase Hackathon) | React, TypeScript, FastAPI, Python, AI

Fall 2025

- Created application for non-profit Team IMPACT to intelligently connect student-athletes to children with serious illnesses or diseases using web scraping and AI match pairing. Automated alumni outreach emails.

PDF Malware Detector (Millennium Capital) | Python, SVM, ML

Spring 2025

- Built SVM-based malware detector using 2022 dataset; extracted structural features and scaled data; benchmarked against logistic regression and Random Forest with 88% accuracy. Presented project at Millennium NYC office.

LeadDog AI (Startup) | Python, Web Scraping, API

Summer 2024

- AI lead generation software identifying employees for targeted sales campaigns; bypassed rate limits of public/private APIs using various techniques.

StudyBot (Personal) | Python, AWS EC2, Discord API

Fall 2020

- Developed multiplayer Discord trivia game using Quizlet sets, deployed to 100+ discord servers.

TECHNICAL SKILLS

Languages: Python, Java, Go, JavaScript, C/C++, SQL, HTML/CSS, Assembly, Markdown, PostgreSQL, TypeScript

Frameworks: Java Spring Boot, Flask, ReactJS, Django, Material-UI, CSS, Kubernetes, FastAPI

Developer Tools: Git, Docker, VSCode, IntelliJ, Burp Suite, PyCharm, GoLand, Cursor, CoPilot

Libraries: Pandas, NumPy, PyTorch, TensorFlow, OpenCV, BeautifulSoup, Playwright, Selenium

Other Skills: AWS, GCP, Agile, Linux, Adobe (PS, LR, Premiere), Jira, Ghidra, CI/CD pipelines, NLP, MongoDB
